

La web

Utilizamos la web todos los días

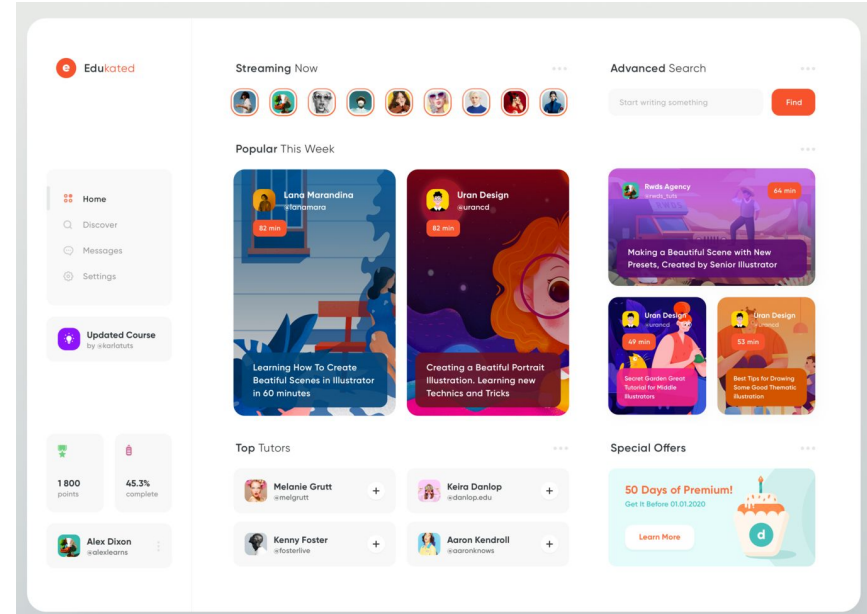

Vivimos y trabajamos ahí

Pero podemos **construirlo**

No solo observar y consumir -> construir

Y cómo mejoramos?

Que vamos a necesitar?

1. Buen ánimo.
2. Práctica, mucha práctica.
3. Constancia.
4. Compartir y Ayudar.

Todos llegamos al mismo **sitio**

edication, you strive to the process, in that sense not fail at learning, and re periods where you must yourself to do it again.

You can't fail

Treat it like a Holiday

Do it again

You find & learn something new, that's great! Now do it again. Self-improvement is an ongoing journey. Endeavour to keep pushing the boundaries.

Creating a Routine

Once you've gotten underway, continue dedicating time each day or week until learning becomes second nature.

Avoid Mindlessness

easy to fall into the trap of chugging endless youtube videos. I see the irony of this video, plan what you want to watch or otherwise 'youtube' will...

Keep your schedule

It's easy to let things slip, so always dedicate a block of time towards your own improvement.

Energy

Do you sometimes feel like you just don't have the energy to sit down and learn the newest trending programming language or library?

It's the idea of the day & you're tired

Chores

Lunch

You just need to finish off some other things before you start.

Another youtube video

Fatigue from many options and the constant changing libraries.

Not understanding something makes us feel lacking.

Fear

Moving outside the bubble you know can be scary. Who knows what's out there.

What if I am learning this new it is depreciated

Motivation learning to code

Safe Bubble
you may feel comfortable in your safe bubble of libraries & languages you already know

Can My No! can

JavaScript Keeps Changing

3 2 1

Small Step Forward

Any height is scary if you look off the edge. That's why you should take small steps down.

5 minute rule

Commit to just 5 minutes to learn. If you can get started for just 5 minutes you might later find you want to spend more

Getting Started

Pick a library or language and do their easy 'hello world' tutorial or create your own project on a subject that you'll enjoy

Journey Before Destination

People often focus too much on the end goal rather than the process.
